- Existing competing products or other research or development programs that may result in competing innovations

CLS evaluates submissions on a rolling basis. However, we must receive your application for the Fall 2022 session no later than close of business July 15, 2022.

About CLS FAST Program

Since launching in Fall 2013, FAST program cycles have generated more than 9000 advisory hours valued at over \$2,000,000 for the 102 companies who have been through the program. Since participating in FAST, these companies have raised > \$2.4B and created 790 new jobs, more than tripling their workforce. 36 of these companies have secured Series A and beyond, and 21 have concluded strategic partnerships.

The FAST Advisory Program provides select entrepreneurs with intensive team review and coaching to perfect their business model and product development plans, and to build a compelling commercialization strategy. Experienced entrepreneurs, product, and business experts (which may include clinical development, regulatory, reimbursement and business development specialists) will advise selected Fellows during a twelve-week program.

If you are interested in sponsoring FAST, please contact Lori Lindburg at lori@califesciences.org.
